

Bilkent University

Department of Industrial Engineering

The department of Industrial Engineering at Bilkent University is inviting applications for its graduate programs for students who will start in fall 2023. An online information session (via zoom) will be held to introduce the department and the graduate programs on **March 25**, as part of the Graduate School Open House event. Please check the following link for further information on the open house program and **to register for the event**.

<http://gradopenhouse.bilkent.edu.tr/>

The department offers **M.S. and Ph.D. degrees**. The M.S. program involves thesis work and is specifically tailored to establish necessary background in Mathematics and Operations Research for students who will later pursue Ph.D. degrees. Most of the alumni from the MS program continue their Ph.D. studies in Industrial Engineering, Operations Research, Management Science, Operations Management and other related areas at leading universities across the world. These universities include Carnegie Mellon, Chicago, Columbia, Georgia Tech, Northwestern and University of Pennsylvania.

The Ph.D. program prepares the students for academic careers. Almost all of our Ph.D. alumni have taken up positions at universities in Turkey and overseas. Some of these universities are Bath, Bilkent, HEC Montreal, Liverpool, Koç, Michigan State, ODTÜ, Sabancı, TED, TOBB-ETÜ and Waterloo.

All students that are admitted to the graduate programs are provided **scholarships to cover the tuition**. Most students receive **additional financial support to cover living expenses and on-campus housing**. The amount varies depending on the credentials, but is generally sufficient to cover student expenses.

The department has 19 full-time faculty members conducting research in diverse areas including optimization, stochastic modeling, scheduling, logistics, supply chain management, manufacturing, healthcare management, financial mathematics, energy systems, revenue management, sustainable operations, multi-objective decision making, and statistics.

Recent journal publications of the faculty can be accessed from the following link:
